PROJECTS

- **QuizLand**
 - This is a quiz application where users can answer questions and test their knowledge.
 - I built this project using HTML, CSS, JavaScript, and React.
 - It helped me understand component structure and basic state management in React
- **Github User Finder**
 - This project allows users to search GitHub profiles using a username.
 - It fetches data from the GitHub API and displays user details.
 - Through this project, I learned how to work with APIs and handle dynamic data in React.
- **Github Battle App**
 - This application compares two GitHub users based on their profile data.
 - Users can enter usernames and see the comparison result.
 - It helped me improve my understanding of React components and data handling.
